# NSA DATA SANITIZATION

## DD-1XT5 NSA/DoD Degauss and Destroy Package

### NEW! NSA Degauss and Destroy Requirement

Effective 2021, new National Security Agency (NSA) hard drive sanitization standards require **both degaussing and physical destruction** before the media is removed from its secure environment.

Garner's NSA Data Destruction Package, the DD-1XT5, meets this new NSA standard. Our TS-1XT degausser destroys the data; then, the PD-5 physically destroys the media. Both devices have been rigorously tested by the NSA and are Evaluated Products List (EPL) listed.

Stay one step ahead of the NSA's requirements by adding Garner's exclusive IRONCLAD® Erasure and Destruction Verification System to your package. IRONCLAD documents the entire degaussing and destruction process by collecting the TS-1XT and PD-5's performance data, media serial numbers, operator ID, and JPG images of the hard drives. IRONCLAD then generates exportable reports to verify the media was properly sanitized.

DD1XT5 shown with SSD-1 solid-state destroyer

### Package Includes:

#### NSA-Listed TS-1XT Degausser

- **Fast** - 15 seconds for complete erasure of all data
- 20,000 Gauss completely erases all data on hard drives
- Degauss multiple drives at one time
- The newest degausser listed on the NSA Evaluated Products List (EPL)
- ETL Listed • UL, IEC, CSA and CE certified

#### NSA-Listed PD-5 Physical Destroyer

- 10+ tons of crushing force
- Crushes helium drives
- Fast 20-second cycle time
- Sturdy crush chamber stands up to enterprise use
- Electric motor, no messy hydraulics
- ETL Listed • UL, IEC, CSA and CE certified

### Recommended Options:

#### IRONCLAD® Destruction Verification

- Documents the destruction process
- Acts as a digital witness automatically verifying data erasure and physical destruction and with a permanent record of destruction
- Captures a JPG image of erased and destroyed media
- Generates a Certificate of Erasure and Destruction report, including crush depth of the PD-5

#### SSD-1 Solid-State Destroyer

- 90 spikes puncture, perforate, waffle, and demolish individual memory chips on solid-state media, thumb drives, and SSDs preventing data retrieval
- For use with the PD-5

### Platform Options:

Enclosed Destruction Cart

Data Eliminator Cart

Recycle Workstation

Mobility Case
