

We Destroy Your Data

Degauss-IT Before you Retire-IT

Data Destruction Services

IRONCLAD Certified Data Destruction Services

- 1 Forensic recovery...impossible! The data simply no longer exists.**
We degauss your hard drives and tapes using a Garner degausser with a strong, focused magnetic force that ELIMINATES ALL DATA on working and non-working hard drives, leaving the media safe for recycling or disposal.
- 2 Mangled HDDs and SSDs...Visual confirmation of destruction**
We physically destroy the media using a Garner PD-5 Destroyer with 10+ tons of force and a hardened steel crushing wedge that breaks, mangles and bends hard drives. 90 Spikes of our patented Solid-State Destroyer puncture, perforate, and waffle SSDs, demolishing the individual memory chips.
- 3 IRONCLAD Certificate of Erasure and Destruction... Proof we did the job right!**
We leave you with proof that we did our job. Garner's exclusive IRONCLAD Erasure and Destruction Verification System automatically generates a Certificate of Erasure and Destruction, with JPG images of the degaussed media in a PDF file for your audit department.

Bring the Destruction to the Data...

On-Site Service

Observe our quiet and clean degaussing and destruction operations performed at your facility.
