**Can be used with any media destruction system**

**Detailed Record Keeping**

- Tracks and records media serial/asset numbers, user ID, witness ID, date, time, and location in a password-protected system.
- Provides evidence media was destroyed by capturing a JPG image of the media.
- Informs operator with a green "Processed" when complete
- Operates in two modes: "Verification Mode" with prompts for new operators; and "Processing Mode" for faster processing.

**Exportable Reports**

- CSV files with detailed media destruction information and results
- High resolution JPG images of each piece of processed media
- Excel files with detailed media destruction information and results
- PDFs with Certificates of Destruction and JPG images of processed media
- Export options: Flash, Ethernet, or optional optical media burner

**Package Includes**

- » Image capture system
- » Touchscreen control head
- » Report generating software
- » Barcode scanner for recording media serial numbers
