## Detailed Record Keeping

- Tracks and records media serial/asset numbers, user ID, witness ID, date, time, location and diagnostic information in a password-protected system
  - Provides proof media was sanitized by automatically capturing a JPG image of the media immediately after degaussing\*
  - Informs operator with a green "PASS" or red "FAIL" and numerically records the degausser's field strength immediately after each degauss cycle\*
  - Records the Garner PD-5 crush depth immediately after each cycle
  - For hard drive and solid-state physical destruction, captures a before and optional after destruction JPG media image
  - Operates in 2 modes: "Verification Mode" with prompts for new operators, and "Processing Mode" for faster processing
  - ETL Listed • UL, IEC, CSA and CE certified • FCC compliant
- \* Garner degaussers only

## Exportable Reports

- CSV files with detailed media destruction information and results
- High resolution JPG images of each piece of processed media
- Excel files with detailed media destruction information and results
- PDFs with certificates of erasure & destruction and JPG images of processed media
- Gauss testing log & report verifying Garner degausser performed to factory specifications
- Export options: flash, Ethernet, or optional optical media burner

## IRONCLAD Verification

Add IRONCLAD to any Garner Degausser and/or destroyer. The IRONCLAD universal model can be integrated into an existing destruction process or function as a stand-alone witness verification.
