PD-5 NSA-Listed Destroyer

The NSA-listed PD-5 physically destroys hard drives by bending, breaking, and mangling the hard drive and its internal components including the data platters. Using a rugged, stainless-steel crushing wedge, the PD-5 bends the data platters, preventing the hard drive from “spinning up” or the hard disk platters from being removed and placed on a spin stand used in laboratory data recovery techniques. The PD-5 also cracks the hard-drive housing, breaks the PC board, and smashes the read-write heads. Best for use after degaussing, the PD-5 ensures total hard drive destruction.

Secure and Compliant

The PD-5 NSA-listed destroyer helps satisfy the most stringent government and industry standards, including:

- NSA/CSS SDDM 9-12
- NIST SP 800-88r1
- CCPA (California Consumer Privacy Act)
- DoD Emergency Destruction Guidelines
- GDPR (General Data Protection Regulation)
- GLBA (Gramm-Leach-Bliley Act)
- HIPAA (Health Information Portability and Accountability Act)
- PCI DSS 3.2 (Payment Card Industry Data Security Standard)
- PIPEDA (Personal Information Protection and Electronic Documents Act)
- TAA

International Standards

Independently tested and certified to meet CE safety, compatibility, and interference standards.

IRONCLAD® Verification

Add the IRONCLAD Integrated Auditing System. IRONCLAD captures a JPG image of the media and automatically generates a Certificate of Destruction, including the crush depth of the PD-5 physical destroyer.

PD-5 Features

- Listed on the NSA Evaluated Products List
- 10+ tons of force bends, breaks, and mangles hard drives, including data platters and other internal components, preventing data recovery
- Destroys up to 1,800 (2.5 in.) and 360 (3.5 in.) hard drives per hour
- Destroys solid-state media, flash drives, USB thumb drives, mobile phones, and SSHD controller boards when used with optional patented SSD-1
- Destruction report capable when used with IRONCLAD or SCAN-1
- Crushes multiple drives at a time
- Total destruction in under 20 seconds
- Quiet, office friendly design

SSD-1 Solid-State Destruction

Add the SSD-1. Ninety spikes puncture, perforate, waffle and demolish individual memory chips on solid-state media, thumb drives, mobile phones, and SSHDs preventing data retrieval.
